GHS Signal V		Danger				
GHS Hazard I	Phrases:	H227 - Combustible liquid.				
		H303 - May be harmful if swallowed.				
		H313 - May be harmful in contact with skin.				
		H370 - Causes damage to organs	relenged or reported evenesure			
		H372 - Causes damage to organs through prolonged or repeated exposure. H400 - Very toxic to aquatic life.

Conditions To Avoid - Hazardous Reactions:	No data available.		
	11. Toxicological Information		
Toxicological Information:	Specific target organ toxicity - single exposure: Based on the concentration of fipronil in the mixture, the specific target organ toxicity - single exposure classification is a Category 1. Animal studies and human pharmacoviligance reports identify fipronil as a neurotoxicant.		
	Specific target organ toxicity - repeated exposure: Based on the concentration of fipronil in the mixture, the specific target organ toxicity - repeated exposure classification is a Category 1. Animal studies and human pharmacovigilance reports identify fipronil as a neurotoxicant. Signs and symptoms include: sweating, nausea, vomiting, headache, abdominal pain, dizziness, agitation, weakness and/or tonic-clonic seizures.		
Sensitization:	Not available.		
Carcinogenicity/Other Information:	Fipronil is classified at a Group C Possible Human Carcinogen based on laboratory animal studies (increased thyroid tumors in male and female rats). Humans and rats have the same of the mechanism of action which produced fipronil-induced thyroid tumors in the rat; however, the rat appears to be more highly sensitive than humans. Therefore, fipronil-induced rat thyroid tumors are not considered suggestive of a human health risk. None of the remaining ingredients in the mixture are considered to be carcinogenic.		
Carcinogenicity:	NTP? No IARC Monographs? No OSHA Regulated? No		
	12. Ecological Information		
	No data available.		
Results of PBT and vPvB assessment:	PBT/vPvB assessment not available as chemical safety assessment not required/not conducted.		

		13. Disposal C					
Waste Disposal Method:		-	Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Observe all federal, state, and local environmental regulations.
